What Customers Are Saying:

In only a few months, Lightstream helped us identify and remediate several security vulnerabilities, improve compliance by 26%, technically rightsize applications and cut our cloud spend by 35%.

-Richard Mann, chief product officer, Decisely

Build, Manage and Secure Your Cloud

Are security, technical expertise, the demand for new skills and staff creating obstacles to implementing your cloud strategy?

Lightstream Cloud Managed Services (CMS) help you solve these challenges by improving the day-to-day administration and management of your cloud infrastructure through a flexible mix of consulting, integration and managed services.

Four Key Areas of Management

Our team of highly trained and certified cloud and security experts will support your deployments through four key areas of effective cloud management. We use leading cloud management platforms to provide visibility into resource allocation, usage, service inventory and gaps in security and configuration.

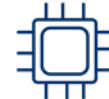

Security

Ongoing expert assessments and reviews using powerful security software

Finance

Fully managed RI and AWS Savings Plan, financial reviews, advanced reporting & dashboards

Technology

Ensure every workload has the optimal balance of performance, reliability and cost

Operational Expertise

Expert, comprehensive, ongoing assistance from a dedicated team
