

Managed Security Services

Connect, protect and optimize

What We Offer

- Cloud Defense – continuous monitoring, detection and incident response for public cloud
- Endpoint Defense – prevention, detection and automated security-incident response at scale
- Edge Defense – management, operation and maintenance of virtual and physical devices at the network's edge
- Access Defense – Secure Access Service Edge (SASE) delivering connectivity via a common cloud infrastructure

Why Choose Us?

- Certified cloud experts on AWS and Microsoft Azure
- AWS Security Competency Partner
- Palo Alto Networks Global Cloud Partner of the Year 2018 and 2019

Solution Partners:

In Risk Management, Outcomes Matter

Positive security outcomes result from understanding and meeting your business objectives. This means managing costs effectively, reducing unnecessary complexity and improving the efficiency of your cyber security services.

Lightstream Managed Security Services improve your security outcomes while securely connecting and protecting your business, meeting your complex compliance requirements and continually optimizing your environment.

Core, Mobile and Public Cloud

No matter where you do business, our services platform and team of highly trained cloud and security experts will protect your employees, customers, applications and supply chains 24/7/365 using next-generation technologies.

Decrease Cost
